

Congratulations!

By considering music education for your child

at an early age, you have taken a first step toward bonding musically with your child and enriching your family life with active music-making. Children are naturally drawn to music, which will make your time with them in Musikgarten both fun and beneficial.

* **Musikgarten** offers a comprehensive, sequential plan for the musical development of your child from birth through beginning piano. Each of our courses stands on its own, yet builds towards the next while fitting the developmental needs of the child. Class time is not only fun, but also educational and purposeful.

* **Musikgarten** classes are based on meeting the musical and developmental needs of children as they grow. Favorite songs, rhymes, dances and activities are revisited throughout, building on what each child has mastered and enjoyed, making successful learning easier.

* **Musikgarten** materials are designed to continue the bonding and fun of music with your child at home. Families receive a superb CD recording of professional musicians and fine children's choir, with selections from classical to jazz, folk to world music, rhymes & other special sounds. Also included are a family activity book and instruments.

“MUSIC is a more powerful tool than any other for higher learning.”
